INTERNATIONAL JOURNAL OF CIRCUIT THEORY AND APPLICATIONS, VOL. 17, iii–iv (1989)

CONTENTS

Volume 17, Issue Nos 1–4

International Journal of
CIRCUIT THEORY AND APPLICATIONS

Issue No. 1, January 1989

Editorial 1

Analysis of the Optimal Double Side-band Converter: V. Belevitch 3

Maximally Linear FIR Digital Differentiators for Midband Frequencies: B. Kumar and S. C. Dutta Roy 21

Dynamics of the Inclusions Appearing in the Return Maps of Chua's Circuit I. The Creation Mechanism: C. Kahlert 29

A Serial Charge Redistribution Logarithmic A/D Converter: C. C. Lefas 47

Cascade Decomposition of a Passive $2n$-port Network: M. Uruski 55

'Lorenz Attractor' from an Electrical Circuit with Uncoupled Continuous Piecewise-linear Resistor: R. Tokunaga, M. Komuro, T. Matsumoto and L. O. Chua 71

Design of Odd-degree Linear-phase Sampled-data Bandpass Filters with Equiripple Amplitude Response: M. F. Fahmy, M. Abo-Zahhad and M. I. Sobhy 87

Pseudopassive Two-dimensional Recursive Digital Filters for Image Processing: M. Domanski and A. Fettweis 103

LETTER TO THE EDITOR

Recursive and Non-recursive Realization of Multidimensional Discrete Systems: B. G. Mertzios and A. N. Venetsanopoulos 115

Issue No. 2, April 1989

Non-reciprocal Network Synthesis Using the Generalized Richards Transformation: R. Unbehauen and G. Zimmer 125

Fault Prediction Process for Large Analogue Circuit Networks: B.-L. Jiang and C.-L. Wey . . . 141

Measuring Volterra Kernels (II): L. O. Chua and Y. Liao 151

Design of Two-dimensional Pseudolossless Digital Filters with Prescribed Spatial Responses: M. Domański 191

Indexed or abstracted by Cambridge Scientific Abstracts, Current Contents, Engineering Index Inc., INSPEC, Mathematical Reviews, Zentralblatt fur Mathematik

On the Development of Symmetrically Stabilized Five-phase Oscillators and Some Implications: B. Z. Kaplan and D. Yardeni 197

Impasse Points. Part I: Numerical Aspects: L. O. Chua and A.-C. Deng 213

LETTERS TO THE EDITOR

Inequalities Relating to the Maximum Voltage and Current in Non-linear Resistive Circuits: J. Cel 237

Biquadratic Programmable SC Filters with Additional Flexibility and Reduced Total Capacitance: J. Silva-Martínez and E. Sánchez-Sinencio 241

Issue No. 3, July 1989

Steady-state Response of Non-linear Circuits: a Frequency-domain Relaxation Method: A. Ushida and L. O. Chua 249

Impasse Points. Part II: Analytical Aspects: L. O. Chua and A.-C. Deng 271

Bifurcation Analysis of a Cusp-constrained Piecewise-linear Circuit: R. Tokunaga, L. O. Chua and T. Matsumoto 283

SC Filters Based on Scattering Parameters: A. Limperis and I. Haritantis. 347

Simultaneous Amplitude and Phase Approximation for FIR Filters: F. Leeb and T. Henk . . 363

Issue No. 4, October 1989

Some Fundamental Properties of Second-order Active *RC* Filters with Composite Operational Amplifiers: A. Urbaś and J. Osiowski 375

CMOS Latchup Theory: A. C. Deng and L. O. Chua. 397

On Weak Completeness and Weak Non-degeneracy of Networks: M. M. Milič and L. A. Novak . 409

Prototype Filters with a Maximally Flat Impulse Response: J. D. Rhodes 421

Darlington's Theorem and Complex Normalization: R. Pauli 429

A New General Method to Model Signal Timing of E/D NMOS Logic: Chung-Yu Wu and Yen-Tai Lin 447

Improved Description of Base Dynamics in the Modelling of Bipolar Transistors: M. Sipilä, V. Porra and M. Valtonen 465

LETTERS TO THE EDITOR

Design of Efficient FIR Digital Differentiators and Hilbert Transformers for Midband Frequency Ranges: B. Kumar and S. C. Dutta Roy 483

On the Calculation of Distortions in Oscillators: Shui-Sheng Qiu and I. M. Filanovsky . . 489

Author Index 495
